CML - ENTSTEHUNG UND STANDORTE CML - HISTORY AND LOCATIONS

CML Innovative Technologies ist ein weltweit agierendes, ISO zertifiziertes Unternehmen mit Entwicklung und Herstellung von hochqualitativen Miniatur-Leuchtmitteln.

Seit unserer Gründung im Jahr 1931 bauen wir stetig unsere Erfahrung aus und haben damit viele Marktstandards setzen können. Als Folge sind wir daher führend in der Branche und mit dem umfangreichsten Sortiment am Markt aktiv. Über 1000 Mitarbeiter engagieren sich in den Bereichen Entwicklung, Fertigung, Vertrieb und Kundendienst für unsere Kunden. Höchste Kundenansprüche spornen uns an, die optimale Lösung für unterschiedlichste Applikationen zu finden und zu realisieren.

CML Innovative Technologies is an ISO certified company which develops and manufactures high quality miniature lighting products for the global marketplace.

Since our formation in 1931, we have continually increased our expertise to set new standards for the lighting industry and this has led us to being a market leader with the ability to offer the most comprehensive product range available. Our 1000+ employees aim to provide high quality solutions for a diverse range of applications, whilst continuing to meet our customers' high expectations in product development, manufacturing and customer service.

CML WORLDWIDE

Entstehung und Historie:

CML Gruppe wird in den Firmenverbund Grupo Antolin integriert

Umfirmierung der Gruppe zu CML Innovative Technologies

EBT wird von SLI (Sylvania Light Industries) übernommen

EBT Bad Dürkheim errichtet ein neues Lager mit einer Fläche von 1700m²

VCH International Ltd wird Teil des Europäischen Geschäfts von SLI Miniature Lighting Ltd

EBT Bad Dürkheim entwickelt LED Signalleuchten, eine innovative Generation von Einbauleuchten

Management buyout innerhalb des General Instrument Lampen Bereichs und Zusammenführung von Vitaliy (V), Chicago Miniature Lamp (C) und Hyvac (H) zu VCH International Ltd

EBT Bad Dürkheim entwickelt MultiLED Lampen, ein revolutionäres Produkt als Ersatz für Kleinstglühlampen

Beginn der Fertigung von Glimmlampen-Assemblies bei EBT in Bad Dürkheim

Gründung von EBT als Handelsunternehmen von Kleinstglühlampen mit Sitz in Bad Dürkheim

Vitality Bulbs wird von General Instruments Corporation übernommen und firmiert zu Vitality Ltd und später zu General Instrument Lamps Ltd um

Vitality Bulbs zieht in die neu errichtete Lampenfertigung in Bury St Edmonds, Suffolk

Wartburg Lamps firmiert zu Vitality Bulbs und zieht nach Green Wood, London um

Gründung von Wartburg Lamps (später Teil des UK Geschäfts von CML Innovative Technologies) in Kentish Town, London

Our history:

CML becomes part of Grupo Antolin

Renaming of the group to CML Innovative Technologies

EBT is taken over by SLI (Sylvania Light Industries)

EBT Bad Dürkheim opens a new warehouse with an area of 1700m²

VCH International Ltd becomes part of the European branch of SLI Miniature Lighting Ltd

EBT Bad Dürkheim develops LED indicators, a new generation of panel mount indicators

Management buyout and integration of Vitality (V), Chicago Miniature Lamps (C) and Hyvac (H) to VCH International Ltd

EBT Bad Dürkheim develops MultiLED lamps a revolutionary new product to replace incandescent miniature lamps

Start manufacturing of neon assemblies at EBT Bad Dürkheim

Formation of EBT as trading firm for incandescent miniature lamps located in Bad Dürkheim

Vitality Bulbs is taken over by General Instruments Corporation and renamed Vitality Ltd, later changed to General Instrument Lamps Ltd

Vitality Bulbs moves to the new purpose built premises in Bury St Edmonds, Suffolk

Wartburg Lamps trades as Vitality Bulbs and moves to Green Wood, London

Formation of Wartburg Lamps (later to become part of the UK business of CML Innovative Technologies) in Kentish Town, London

INDUSTRY

Unsere Produkte finden in den unterschiedlichsten Märkten ihre Anwendung.

Our products are used in various markets and applications

Mit der hohen Effizienz und Langlebigkeit unserer LED Lampen und Signalleuchten decken wir nahezu alle Anforderungen aus Gewerbe und Industrie an flexiblen Signalisierungslösungen ab. Nachhaltige Einsparungen durch sehr geringen Wartungsaufwand sichern einen erheblichen Kostenvorteil.

With our highly efficient long life LED lamps and indicators CML provides flexible solutions for all sections of the industrial market. Our low maintenance products guarantee significant cost savings.

AVIATION

Hochwertige LED Lampen und Glühlampen für den Einsatz in der Luftfahrtindustrie haben sich seit vielen Jahren bewährt.

CML is a leading brand name in the world of aviation lighting. High quality incandescent, halogen, fluorescent and LED products for the aviation industry have been the first choice of airlines for many years.

Gerne senden wir Ihnen unseren ausführlichen Katalog für den Aviation-Markt zu.

Please ask for our detailed aviation market catalogue.

RAILWAY

Licht für eine Welt in Bewegung! CML Produkte sind seit vielen Jahren ein innovativer Bestandteil für Beleuchtungs- und Signalisierungslösungen im Transportwesen.

Light for a world in motion! CML products have been a key element in lighting and signalling solutions for many years.

BUS

Vom Schienenverkehr bis hin zum öffentlichen Straßenverkehr finden LED Produkte von CML ihren Einsatz. Von der Fahrerstands-Signalisierung bis hin zur Kabinen-Beleuchtung sind unsere Produkte im Markt vertreten.

LED products from CML can be found in all markets and applications, from railway to public road transport as well as from driver's stations signals to cabin lighting.

MEDICAL

Anwendungsspezifische Lampen für den Bereich der Medizintechnik: OP Mikroskop Lampen, OP Bereichs Lampen, Dental Lampen und Lampen für verschiedenste medizinische Geräte.

Specific lamps for application in medical instrumentation and technology including microscope lamps, operating theatre lighting, dental lamps and other lamps for a wide variety of medical equipment.

Gerne senden wir Ihnen unseren ausführlichen Katalog für den medizintechnischen Markt zu.

Please ask for our detailed medical market catalogue.

OFFSHORE

Die technologischen Fortschritte bei der Lichtstärke und Lichtausbeute von LEDs bieten viele Möglichkeiten zur Entwicklung von diversen speziellen Lichtlösungen im Offshore Bereich. Langlebige und vibrationsfeste Produkte helfen hier, den Wartungsaufwand gering zu halten.

The technical progress in luminous intensity and efficiency of LEDs offers many possibilities for the development of specific lighting solutions for the offshore industry. Long lasting and vibration resistant products help to reduce maintenance costs.

LED LAMPEN FÜR SIGNALISIERUNG LED LAMPS FOR SIGNALISATION

LED Lampen als klassische Alternative zu Kleinglühlampen.
Bitte besuchen Sie unsere Website www.cml-it.com für

GLÜH- UND GLIMMLAMPEN INCANDESCENT AND NEON LAMPS

Aufgrund ihrer spezifischen Eigenschaften haben diese Lampen nach wie vor ihre Daseinsberechtigung im Markt.

Unsere Glüh- und Glimmlampen sind in vielen verschiedenen Bauformen, Sockeln, Spannungen und Leistungen erhältlich.

Bitte besuchen Sie unsere Website www.cml-it.com für weitere Details und Informationen.

Due to their specific features, these lamps continue to be widely used in the market.

Our incandescent and neon lamps are available in a wide range of shapes, bases, voltages and wattages.

Please visit our website at www.cml-it.com for further details and information.

LEDS UND LED DISPLAYS

LEDS AND LED DISPLAYS

Als jahrzehntelanger Partner und Europäischer Generalimporteur von Kingbright, sowie Distributor von OSA Opto Light, bieten wir neben unseren Eigenprodukten auch ein sehr breites Spektrum an diversen LEDs an.

Gerne senden wir Ihnen den ausführlichen Kingbright Katalog zu.

We have been a partner to and a European general importer for Kingbright for decades as well as being a distributor for OSA Opto Light.

Not only do we offer our own products, but also a wide range of various LEDs. Please ask for the detailed catalogue of Kingbright.

ALLGEMEINE INFORMATIONEN ZU LEUCHTDIODEN GENERAL INFORMATION ON LEDs

Leuchtdioden werden durch eine Vielzahl von Kennwerten charakterisiert. Die wohl wichtigste ist die Lichtstärke (luminous intensity), die jedoch immer unter dem Aspekt des Abstrahlwinkels (viewing angle) gesehen werden muss. Denn gerade im Vergleich zum Lichtstrom (luminous flux), bei dem die gesamte emittierte Lichtleistung angegeben wird, handelt es sich bei der Lichtstärke um eine richtungsabhängige Größe. Abb.1 zeigt den Zusammenhang. Die Lichtstärke ist diejenige Lichtleistung, die auf eine kreisrunde Fläche von 1cm² in einem Abstand von 100mm oder 316mm, gemessen von der LED-Spitze aus, auftritt. Dabei ist es von besonderer Bedeutung, dass die LED in ihrer mechanischen Achse exakt zentrisch und senkrecht auf die Empfängerfläche ausgerichtet ist. Eine Fehljustage kann sich mehr oder weniger stark auf den Messfehler auswirken. Nach CIE 127 wird die Lichtstärke bei einem Abstand von 316mm im Fall I_{LEDA} und 100mm im Fall I_{LEDB} gemessen.

Light-emitting diodes are characterised by various parameters. The most important characteristic parameter is the luminous intensity, which must always be considered relative to the viewing angle. This is due to the fact, that, in contrast to the luminous flux, for which the entire emitted luminous power is specified, the luminous intensity is a directional value. This connection is illustrated in Figure 1. The luminous intensity is the luminous power impinging on a circular area of 1 cm² at a distance of 100mm or 316mm, measured from the top of the LED.

In this context, it is of particular importance that the mechanical axis of the LED is centrally and exactly vertically aligned with respect to the receiving surface. A mismatch can affect the accuracy of measurement. According to CIE 127, the luminous intensity is measured at a distance of 316mm (I_{LEDA}) and 100mm (I_{LEDB}).

Die Lichtstärke ist diejenige Lichtleistung, die auf eine kreisrunde Fläche von 1cm² in einem Abstand von 100mm oder 316mm, gemessen von der LED-Spitze aus, auftritt. Dabei ist es von besonderer Bedeutung, dass die LED in ihrer mechanischen Achse exakt zentrisch und senkrecht auf die Empfängerfläche ausgerichtet ist. Eine Fehljustage kann sich mehr oder weniger stark auf den Messfehler auswirken. Nach CIE 127 wird die Lichtstärke bei einem Abstand von 316mm im Fall I_{LEDA} und 100mm im Fall I_{LEDB} gemessen.

In this context, it is of particular importance that the mechanical axis of the LED is centrally and exactly vertically aligned with respect to the receiving surface. A mismatch can affect the accuracy of measurement. According to CIE 127, the luminous intensity is measured at a distance of 316mm (I_{LEDA}) and 100mm (I_{LEDB}).

LEDs

Leuchtdioden verfügen über eine mehr oder weniger ausgeprägte keulenförmige Abstrahlung. Zur Kennzeichnung des Abstrahlwinkels (viewing angle) wird der Winkel genommen, bei dem die Lichtstärke 50% des Maximalwertes annimmt. Dieser Winkel wird mit $\theta_{1/2}$ bezeichnet und spannt sich von der Mittellinie hin zum 50% Wert auf. Üblich ist auch eine Verwendung des vollen Winkels, dann jedoch mit $2\theta_{1/2}$ bezeichnet (s. Abb.2).

Bei der Beurteilung der Lichtstärke ist es nun nicht unwesentlich, neben dem Lichtstärkewert auch den Vollwinkel zu betrachten. Die Höhe der Lichtstärke alleine ist nämlich kein ausreichendes Kriterium zur Beurteilung der Helligkeit einer Leuchtdiode. In der Abb.2 ist die Abstrahlcharakteristik einer breit abstrahlenden LED aufgezeigt. Der Vollwinkel $2\theta_{1/2}$ beträgt hier 100° . Zu beachten ist, dass sich das Maximum der Intensität auf die mechanische Achse bezieht.

Abb. 2 / Figure 2

Typically, light-emitting diodes show a more or less conical spatial distribution. In order to specify the viewing angle, we take the angle at which the luminous intensity achieves 50% of the maximum value. This angle is identified by $\theta_{1/2}$ and extends from the centre line to the 50% value. Another common procedure is to use the round angle, which is identified by

$2\theta_{1/2}$ (see Figure 2).

With respect to the assessment of the luminous intensity, it is not only important to consider the luminous intensity value, but also the round angle, as the luminous intensity alone is not a sufficient criterion to assess the brightness of a light-emitting diode. Figure 2 shows the spatial dimension of a broadly diffusing LED. In this case, the full viewing angle $2\theta_{1/2}$ is 100° . It must be noted that the maximum intensity refers to the mechanical axis.

LEDs

Eine weitere wichtige Kenngröße der Leuchtdiode ist die Wellenlänge. Es sind verschiedene Angaben, die zur Charakterisierung benutzt werden.

Die Abb. 3 zeigt die verschiedenen Wellenlängen auf. Die Peak-Wellenlänge (λ_{peak}) gibt lediglich diejenige Wellenlänge an, bei der das Maximum der Strahlungsfunktion auftritt und stellt somit einen radiometrischen Wert dar. Daneben wird auch noch vielfach die Halbwertsbreite der Strahlungsfunktion angegeben. Sie wird ermittelt, indem man die Breite des Wellenlängenbereiches bei den Schnittpunkten des 50%-Wertes des Maximums angibt.

Viel aussagekräftiger ist jedoch die Angabe der dominanten Wellenlänge (λ_{dom}). Sie wird rechnerisch ermittelt, berücksichtigt die Farbort-Koordinaten und gibt einen Wert, der das Farbempfinden des menschlichen Auges widerspiegelt. Er stellt somit einen kolorimetrischen Wert dar. Die Angabe der Schwerpunktwellenlänge ist in vielen Fällen ebenso sinnvoll. Sie berücksichtigt auch Banden in anderen Bereichen, beispielsweise wenn die Leuchtdiode einen ausgeprägten Infrarot-Anteil neben dem sichtbaren Anteil besitzt.

Another important characteristic parameter of the light-emitting diode is the wavelength. Different values are used for the characterisation of this value.

Figure 3 shows the various wavelengths. The peak wavelength (λ_{peak}) only specifies the wavelength value with the maximum of the spectral energy distribution. Thus, the peak wavelength represents a radiometric value. In addition, often the half-width value of the spectral energy distribution is specified. This value is determined by specifying the width of the wavelength range at 50% of the value of the maximum.

The specification of the dominant wavelength (λ_{dom}) is, however, much more meaningful. This value is determined by calculation. It considers the colour coordinates and results in a value, which reflects the sensitivity for colour of the human eye. Thus, the dominant wavelength represents a colourimetric value. In many cases, it is also useful to specify the center wavelength. This value also considers bands in other ranges, for example, if the light-emitting diode has, apart from the visible fraction, a distinct infrared fraction.

Abb. 3 / Figure 3

LEDs

In Abb. 4 sind beispielhaft verschiedene Leuchtdioden mit ihrer Strahlungsfunktion normiert aufgetragen. Die schwarze Kurve ist die Strahlungsfunktion einer weiß strahlenden Leuchtdiode.

Erkennbar ist hier das ausgeprägte Maximum im kurzwelligen Blau und die recht breite Verteilung im Gelb/Orangenen Bereich. Dieser Kurvenzug zeigt klar, dass es sich bei der weißen Leuchtdiode nicht um ein dem Temperaturstrahler kompatibles Leuchtelement handelt.

Eine weitere wichtige Kenngröße ist die ähnlichste Farbtemperatur (T_n), die jedoch nur bei der weiß abstrahlenden Leuchtdiode zum Tragen kommt. Die ähnlichste Farbtemperatur ist diejenige Temperatur, die einem Temperaturstrahler am nächsten kommt.

Figure 4 shows the fractional bandwidth of different light-emitting diodes with their spectral energy distribution. The black curve represents the spectral energy distribution of a white light-emitting diode.

In this case, the marked maximum in the short-wave blue range, and the rather broad distribution in the yellow/orange range can be easily identified. This curve clearly shows that the white light-emitting diode is not illuminantly compatible with the thermal radiator.

Another important characteristic parameter is the correlated colour temperature (T_n), which only applies to the white light-emitting diode. The correlated colour temperature is the temperature which comes closest to a thermal radiator.

Abb. 4 / Figure 4

LED LAMPEN FÜR SIGNALISATION

LED LAMPS FOR SIGNALISATION

Allgemeine technische Informationen

General technical information

LED Lampen sind die klassische Alternative zu Kleinglühlampen zur Signalisierung.

LED Lampen besitzen zahlreiche Vorzüge gegenüber Kleinglühlampen:

- extrem lange Lebensdauer
- geringe Wärmeentwicklung
- niedrige Stromaufnahme
- große Stoß- und Vibrationsfestigkeit
- verschiedene Farben zur Auswahl

LED Lampen werden eingesetzt bei:

- schwierigen Betriebsbedingungen mit hohem Stoß- und Vibrationspegel
- Anwendungen, bei denen eine zuverlässige Anzeige erforderlich ist
- Anwendungen, bei denen Lampen schwer zugänglich sind bzw. eine Auswechslung zeitraubend und daher teuer ist

StarLEDs: LED Lampen mit einer bedrahteten oder einer SMD LED.

Mega StarLEDs: LED Lampen mit mehreren bedrahteten oder mehreren SMD LEDs.

Unsere LED Lampen verfügen über einen integrierten Widerstand und können in folgenden Ausführungen zur Verfügung stehen:

Ohne Gleichrichter: Nur für Einsatz an Gleichspannung geeignet. Polarität beachten!

Mit Einweggleichrichter: Diese LED Lampen sind alle mit einer Schutzdiode in Reihe zum Widerstand und der LED gefertigt. Sie können problemlos bei Gleich- und Wechselspannung eingesetzt werden.

Der typische Helligkeitsrückgang bei Wechselspannung gegenüber dem Betrieb an Gleichspannung liegt bei ca. 25%.

Mit Brückengleichrichter: Problemloser Einsatz an Gleich- und Wechselspannung. Keine Helligkeitsunterschiede. Bi-Polarität an DC-Betrieb.

LED lamps are the classical alternative for miniature incandescent lamps for signalisation.

LED lamps have a lot of advantages compared with miniature incandescent lamps:

- extreme long lifetime
- low heat generation
- low power consumption
- shock and vibration proof
- variety of colours

LED lamps are used in:

- applications with a high vibration level
- applications where a reliable indicator is needed
- applications where it is difficult or expensive to change a lamp

StarLEDs: LED lamps with one through-hole LED or one SMD LED.

Mega StarLEDs: LED lamps with several through-hole LEDs or several SMD LEDs.

Our LED lamps are built with an integrated resistor and they can be available in the following versions:

Without rectifier: Only for use on DC voltage. Please be aware of the polarity!

With half-wave rectifier: The LED lamps are built with a protection diode in series with a resistor and LED. They can be used without any problems on DC voltage and AC voltage. The typical light reduction on AC voltage against DC voltage operation is about 25%.

With bridge rectifier: Can be used without any problems on DC voltage and AC voltage with the same light output. Bi-polarity on DC voltage.

Spannungstoleranz: +10%
 Umgebungstemperatur: -20°C - +60°C
 Lagertemperatur: -25°C - +80°C

Voltage tolerance: +10%
 Ambient temperature: -20°C - +60°C
 Storage temperature: -25°C - +80°C

Sicherheitsvorteil: Auch bei defekter oder entfernter Farbkappe eines Befehls- und Meldegerätes ist die Information des Farbsignals vorhanden.

Safety feature: When the coloured lens of a pushbutton is broken or missing the indication is given by the colour of the LED.

Die 230V AC Typen eignen sich auch zum Einsatz in handelsüblichen Lampenfassungselementen mit integriertem Vorwiderstand. Sie ersetzen somit direkt die 130V 20mA Glühlampen.

The 230V AC versions can be used in commercial lampholders with an integrated resistor. They replace directly the 130V 20mA incandescent lamps.

LED Lampen mit „weiß klaren“ und „weiß diffusen“ LEDs unterscheiden sich in ihrer Abstrahlcharakteristik. Während die „weiß klare“ LED konzentrierter strahlt, verfügt die „weiß diffuse“ LED über einen größeren Abstrahlwinkel und gewährleistet eine homogenere Ausleuchtung.

There is a difference between LED lamps with „white clear“ LEDs and „white diffused“ LEDs in their viewing characteristics. The „white clear“ LEDs shines in a concentrated ray, the „white diffused“ LED has a wider viewing angle, which ensures a more homogeneous illumination.

Alle angegebenen Maße in mm.

All dimensions are given in mm.

Spannung

Die aufgeführten Spannungen sind Bemessungsspannungen. Sie sind die Versorgungsspannungen, auf die die LED Lampen dimensioniert sind. Die Angabe AC/DC/UC erfolgt entsprechend der DIN 40004 (UC bedeutet AC oder DC, gebräuchlich ist auch die Bezeichnung AC/DC). Wechselstromgrößen werden stets als Effektivwert eingesetzt.

Voltage

The voltages listed are rated voltages. These voltages are the supply voltages for which the LED lamps are designed. The specifications AC/DC/UC are in accordance with DIN 40004. The abbreviation UC means AC or DC and is more commonly referred to as AC/DC. Alternating current is considered always at the effective value (RMS).

Strom

Der aufgeführte Strom ist der Bemessungsstrom. Er fließt bei der Bemessungsspannung. Wechselstromgrößen werden, wenn nicht anders angegeben, als Effektivwert angegeben.

Current

The current, which is listed, is the rated current. The current will flow at the rated voltage. Alternating current is considered always at the effective value (RMS), if not otherwise specified.

Umgebungstemperatur

Die Umgebungstemperatur ist diejenige Temperatur, die in unmittelbarer Nähe des Leuchtmittels auftritt. Alle Bemessungswerte beziehen sich grundsätzlich auf den offenen Aufbau und eine Umgebungstemperatur von 25°C.

Ambient temperature

The ambient temperature is the temperature taken within close proximity of the LED lamps. All rated values are referred to as an open set-up and an ambient temperature of 25°C.

Sockel

Die verschiedenen Baureihen beinhalten Metall- und Kunststoffsockel, welche internationalen und nationalen Vorschriften entsprechen.

Base

All product types with bases from metal and plastic conform to international and national standards.

Markierung

Eine Markierung erfolgt, je nach Platzverhältnissen, mit Spannung, Stromart, Fertigungsdatum und Polaritätskennzeichnung.

Marking

Marking made on bases are dependant on the space available. Specifications such as voltage, current, date of production and polarity can all be accommodated on the base, if required and if there is space available.

- Bei LED Lampen mit Flansch-, Rillen-, Bajonett- und Schraubsockel ist der mittlere Fußkontakt die Anode (+).
- Bei LED Lampen mit Bi-Pin- und Telefonstecksockel (Keilsockel) ist die Anode (+) durch + auf der Seite des Sockels markiert.
- Bei LED Lampen mit Quetschfuß ist die Anode (+) mit einer schwarzen Markierung auf dem Kunststoffsockel versehen.

- LED lamps with midget flange, midget groove, bayonet and screw base have their anode (+) as the base center contact.
- LED lamps with bi-pin and telephone base have the anode (+) marked with + at the side of the base.
- LED lamps with wedge base have a black mark on the plastic base for the anode (+).

Die T20x46 Mega StarLEDs finden Ihren Einsatz in Warnleuchten. Sie können in allen gängigen Warnleuchtsäulen mit BA15d Lampenfassung eingesetzt werden.

Unabhängig vom Fabrikat gewährleisten sie eine optimale Ausleuchtung der Signalelemente.

The T20x46 Mega StarLEDs are developed for light towers. They can be used in all common light towers with BA15d lamp holder. They deliver an optimum illumination.

LED SIGNALLEUCHTEN

LED PANEL MOUNT INDICATORS

Allgemeine technische Informationen

General technical information

Die hochwertigen LED Signalleuchten vom CML sind in Bezug auf Preis und Qualität die perfekte Alternative zu herkömmlichen Meldeleuchten mit Signal-Glühlampen.

Sie stehen mit hochglanzverchromtem, schwarzverchromtem, mattverchromtem Messing-Reflektor oder mit schwarzem Kunststoff-Reflektor zur Verfügung und können mit oder ohne integriertem Vorwiderstand geliefert werden.

Die Flachstecker der Signalleuchten ermöglichen ein schnelles und sicheres Anschließen an die Versorgungsspannung.

LED Signalleuchten gibt es für den Einbaudurchmesser 6, 8, 12, 14, 16, 19 und 22mm.

Sie zeichnen sich aus durch:

- günstiges Preis-Leistungsverhältnis
- sehr hohe Schockfestigkeit
- extrem lange Lebensdauer
- einfache Montage
- vielfältiger Einsatz durch hohe Schutzart
- niedriger Energieverbrauch

Spannungstoleranz: +10%
Umgebungstemperatur: -20°C - +60°C
Lagertemperatur: -25°C - +80°C

High-grade LED panel mount indicators from CML are a perfect alternative to all common indicators with incandescent lamps in relation to price and quality.

They are available with satin chrome, black chrome, matt chrome metal bezel or with black plastic bezel. We offer them with or without integrated resistor.

Connection is made by faston tab terminals.

LED panel mount indicators are available for panel cut outs of 6, 8, 12, 14, 16, 19 and 22mm.

Features of these products are:

- cost effectiveness
- shock and vibration proof
- extremely long lifetime
- easy to install
- high degree of protection
- low power consumption

*Voltage tolerance: +10%
Ambient temperature: -20°C - +60°C
Storage temperature: -25°C - +80°C*

Zulassungen:

Approvals:

LED Signalleuchten LED Panel Mount Indicators

LED Signalleuchten für den Einbaudurchmesser von 6mm (+0,2mm) sind mit hellen, verschiedenfarbigen, diffusen 3mm LEDs bestückt. Sie sind mit hochglanzverchromten, schwarzverchromten oder mattverchromten Messingreflektoren lieferbar. Der Anschluss erfolgt in der Regel über Flachstecker 2,0 x 0,5mm. Die entsprechenden Flachsteckhülsen finden Sie auf der Zubehör-Seite. Die Montage der LED Signalleuchten erfolgt mittels der mitgelieferten Sprengringe und Muttern.

Messingflachstecker = Anode (+)
verzinnter Flachstecker = Kathode (-)

LED panel mount indicators for a 6mm (+0.2mm) mounting hole are manufactured with high brightness coloured diffused 3mm LEDs. These LEDs are fitted in high quality satin chrome, black chrome or matt chrome metal bezels, supplied with fixing nut and washer. Connection is usually by faston tab terminals 2.0 x 0.5mm. Suitable crimp connectors can be found on the page for accessories.

Brass terminals = anode (+)
Tinned terminals = cathode (-)

LED Signalleuchten LED Panel Mount Indicators

LED Signalleuchten für den Einbaudurchmesser von 8mm (+0,2mm) sind mit hellen, verschiedenfarbigen, diffusen 5mm LEDs bzw. Linsen bestückt. Sie sind mit hochglanzverchromten, schwarzverchromten oder mattverchromten Messingreflektoren lieferbar. Der Anschluss erfolgt in der Regel über Flachstecker 2,8 x 0,8mm. Die entsprechenden Flachsteckhülsen finden Sie auf der Zubehör-Seite. Die Montage der LED Signalleuchten erfolgt mittels der mitgelieferten Sprengringe und Muttern.

Messingflachstecker = Anode (+)
verzinnter Flachstecker = Kathode (-)

LED panel mount indicators for a 8mm (+0.2mm) mounting hole are manufactured with high brightness coloured diffused 5mm LEDs or lenses. These LEDs or lenses are fitted in high quality satin chrome, black chrome or matt chrome metal bezels, supplied with fixing nut and washer. Connection is usually by faston tab terminals 2.8 x 0.8mm. Suitable crimp connectors can be found on the page for accessories.

Brass terminals = anode (+)
Tinned terminals = cathode (-)

LED Signalleuchten LED Panel Mount Indicators

LED Signalleuchten für den Einbaudurchmesser von 12mm (+0,2mm) sind mit hellen, verschiedenfarbigen, diffusen 8mm LEDs bzw. Linsen bestückt. Sie sind mit hochglanzverchromten, schwarzverchromten oder mattverchromten Messingreflektoren lieferbar. Der Anschluss erfolgt in der Regel über Flachstecker 2,8 x 0,8mm. Die entsprechenden Flachsteckhülsen finden Sie auf der Zubehör-Seite. Die Montage der LED Signalleuchten erfolgt mittels der mitgelieferten Sprengringe und Muttern.

Messingflachstecker = Anode (+)
verzinnter Flachstecker = Kathode (-)

LED panel mount indicators for a 12mm (+0.2mm) mounting hole are manufactured with high brightness coloured diffused 8mm LEDs or lenses. These LEDs or lenses are fitted in high quality satin chrome, black chrome or matt chrome metal bezels, supplied with fixing nut and washer. Connection is usually by faston tab terminals 2.8 x 0.8mm. Suitable crimp connectors can be found on the page for accessories.

Brass terminals = anode (+)
Tinned terminals = cathode (-)

LED Signalleuchten LED Panel Mount Indicators

LED Signalleuchten für den Einbaudurchmesser von 14mm (+0,2mm) sind mit hellen, verschiedenfarbigen, diffusen 10mm LEDs bzw. Linsen bestückt. Sie sind mit hochglanzverchromten, schwarzverchromten oder mattverchromten Metallreflektoren lieferbar. Der Anschluss erfolgt in der Regel über Flachstecker 2,8 x 0,8mm. Die entsprechenden Flachsteckhülsen finden Sie auf der Zubehör-Seite. Die Montage der LED Signalleuchten erfolgt mittels der mitgelieferten Sprengringe und Muttern.

Messingflachstecker = Anode (+)
verzinnter Flachstecker = Kathode (-)

LED panel mount indicators for a 14mm (+0.2mm) mounting hole are manufactured with high brightness coloured diffused 10mm LEDs or lenses. These LEDs or lenses are fitted in high quality satin chrome, black chrome or matt chrome metal bezels, supplied with fixing nut and washer. Connection is usually by faston tab terminals 2.8 x 0.8mm. Suitable crimp connectors can be found on the page for accessories.

Brass terminals = anode (+)
Tinned terminals = cathode (-)

LED Signalleuchten LED Panel Mount Indicators

LED Signalleuchten für den Einbaudurchmesser von 16mm (+0,4mm) sind mit hellen, verschiedenfarbigen, diffusen 10mm LEDs bzw. Linsen bestückt.

Zur Auswahl stehen drei Linsenformen:

- runde Linse
- flache Linse
- konische Linse

Sie sind mit hochglanzverchromten, schwarzverchromten oder mattverchromten Messingreflektoren sowie schwarzen Kunststoffreflektoren lieferbar. Der Anschluss erfolgt in der Regel über Flachstecker 2,8 x 0,8mm. Die entsprechenden Flachsteckhülsen finden Sie auf der Zubehör-Seite. Die Montage der LED Signalleuchten erfolgt mittels der mitgelieferten Sprengringe und Muttern.

Messingflachstecker = Anode (+)
verzinnter Flachstecker = Kathode (-)

LED panel mount indicators for a 16mm (+0.4mm) mounting hole are manufactured with high brightness coloured diffused 10mm LEDs or lenses.

These indicators can be delivered with three different lens shapes:

- round lens
- flat lens
- conical lens

These LEDs or lenses are fitted in high quality satin chrome, black chrome or matt chrome metal bezels or in black plastic bezels, supplied with fixing nut and washer. Connection is usually by faston tab terminals 2.8 x 0.8mm. Suitable crimp connectors can be found on the page for accessories.

Brass terminals = anode (+)
Tinned terminals = cathode (-)

Standardreflektor runde Linse mit Vorwiderstand und Einweggleichrichter IP67 / Standard bezel round lens with resistor and half-wave rectifier IP67

LED Signalleuchten LED Panel Mount Indicators

LED Signalleuchten für den Einbaudurchmesser von 19mm (+0,4mm) sind mit hellen, verschiedenfarbigen, diffusen 10mm LEDs bzw. Linsen bestückt.

Zur Auswahl stehen drei Linsenformen:

- runde Linse
- flache Linse
- konische Linse

Sie sind mit hochglanzverchromten, schwarzverchromten oder mattverchromten Metallreflektoren lieferbar. Der Anschluss erfolgt in der Regel über Flachstecker 2,8 x 0,8mm. Die Montage der LED Signalleuchten erfolgt mittels der mitgelieferten Sprengringe und Muttern.

Messingflachstecker = Anode (+)
verzinnter Flachstecker = Kathode (-)

LED panel mount indicators for a 19mm (+0.4mm) mounting hole are manufactured with high brightness coloured diffused 10mm LEDs or lenses.

These indicators can be delivered with three different lens shapes:

- round lens
- flat lens
- conical lens

These LEDs or lenses are fitted in high quality satin chrome, black chrome or matt chrome metal bezels, supplied with fixing nut and washer. Connection is usually by faston tab terminals 2.8 x 0.8mm. Suitable crimp connectors can be found on the page for accessories.

Brass terminals = anode (+)
Tinned terminals = cathode (-)

Standardreflektor runde Linse mit Vorwiderstand und Einweggleichrichter IP67 / Standard bezel round lens with resistor and half-wave rectifier IP67

Standardreflektor flache Linse 130/230V AC mit Berührungsschutzhülse IP67 / Standard bezel flat lens 130/230V AC with protection tube IP67

Die 130VAC und 230VAC Versionen werden grundsätzlich mit Berührungsschutzhülse geliefert.
In general we supply the 130VAC and 230VAC versions with a protection tube.

LED Signalleuchten LED Panel Mount Indicators

LED Signalleuchten für den Einbaudurchmesser von 22mm (+0,5mm) sind mit verschiedenfarbigen, diffusen 16mm Linsen bestückt.

Zur Auswahl stehen zwei Linsenformen:

- runde Linse
- flache Linse

Sie sind mit hochglanzverchromten, schwarzverchromten oder mattverchromten Messingreflektoren sowie schwarzen Kunststoffreflektoren lieferbar. Der Anschluss erfolgt in der Regel über Flachstecker 2,8 x 0,8mm. Die entsprechenden Flachsteckhülsen finden Sie auf der Zubehör-Seite. Die Montage der LED Signalleuchten erfolgt mittels der mitgelieferten Sprengringe und Muttern.

Messingflachstecker = Anode (+)
verzinnter Flachstecker = Kathode (-)

LED panel mount indicators for a 22mm (+0.5mm) mounting hole are manufactured with coloured diffused 16mm lenses.

These indicators can be delivered with two different lens shapes:

- round lens
- flat lens

These lenses are fitted in high quality satin chrome, black chrome or matt chrome metal bezels or in black plastic bezels, supplied with fixing nut and washer. Connection is usually by faston tab terminals 2.8 x 0.8mm. Suitable crimp connectors can be found on the page for accessories.

Brass terminals = anode (+)
Tinned terminals = cathode (-)

Standardreflektor runde Linse mit Vorwiderstand und Brückengleichrichter IP67 / Standard bezel round lens with resistor and bridge rectifier IP67
